The postal History of Navarra In the 19th and 20th Centuries

Corella to Borja 31st January, 1861.

The four full margined copy of the 4 cuartos stamp of 1860 on this small envelope has been cancelled by a faint impression in black of the small circular date stamp of Corella, with another, much clearer, nearby. It is interesting to note that the month slug has been inserted into the hand stamp up side down.

A very clear strike in black of the small circular date stamp of Borja on the reverse has been used to record arrival on 1st February.

This type of postmark, in black, was used regularly in Corella between 1859 and 1877.
